GIRVIN DJAPARDI

bit.ly/Girvin-Portfolio • (+65) 83754302 • girvin_djapardi@u.nus.edu • www.linkedin.com/in/girvin-djapardi

A result-oriented team-player with a strong bias towards action who loves embracing dynamic opportunities and connections with diverse people. On top of experience in the strategy, product and investment verticals, his love for innovation and climate impact propelled him to explore the intersections between energy, sustainability and tech.

EDUCATION

National University of Singapore **Aug 2022 - Present**

- Bachelor of Engineering (Hons): Mechanical Engineering
- Minor in Quantitative Finance and Data Analytics

Stanford University International Honors Program (Stanford, USA) **Jun 2023 - Aug 2023**

- Solving Social Problems with Data (A) | Technology Entrepreneurship (A)

SKILLS

Design Thinking | Machine Learning | Process Improvement | Emissions Calculation | Prototyping | CAD | Assembly | Mechanical Design & Systems | Thermal & Energy Systems | Manufacturing | Fluid Mechanics | Data Science |
Software: SolidWorks, Fusion 360, SQL, R, Python, Arduino, MATLAB, Microsoft Office & Google Suite, Figma, Tableau

ENGINEERING PROJECTS

Algorithmic Mitigation of Affective Polarization (Machine Learning | Policy Analysis) **Jun 2023 - Aug 2023**

- Devised an innovative optimization model utilizing real-time data and binary decision variables to minimize exposure to emotionally charged social media content.
- Deployed Python to conduct data cleaning and data analysis on complex data sets from Pew Research Centre, Kaggle etc., creating intuitive visualizations to communicate the project's impact.
- Executed extensive literature research, proposing, and evaluating Information-to-Action implementations via Public Policy and Private Firm routes to fuel top-down and bottom-up change.

Autonomous Steering Robot **Jan 2023 - May 2023**

- Wired a responsive closed-loop control system with Arduino, integrating LDRs and LEDs as 'eyes', optimizing real-time path adjustment and ensuring precise navigation at various bends.
- Remodeled chassis by streamlining dimensions of the universal plate and fine-tuning parameters of gearbox, allowing support 5x of its body weight whilst finishing with a top 15% time.
- Optimized positioning of its eyes and wheels to catapult 90-degree turns success from 50% to 85%.

Autonomous Multi-terrain with in-built Catapult Robot **Jan 2023 - May 2023**

- Assembled robust and lightweight **mechanical chassis** within the 30x30x30 cm design constraint with **CAD**, achieving top 10% of lowest weight class amongst 100+ robots.
- Conducted Speed-to-weight analysis by standardizing positions of Arduino and curating wheel's design, optimizing vehicle's centre of gravity to ensure smooth traversing across bumpy terrain.
- Refined algorithm parameters, reducing jerking incidents when operating servo meter by 40%.

WORK EXPERIENCE

Mechanical & Electrical Carbon Calculator Intern at Energy Studies Institute **Oct 2023 - Present**

- Integrated LLMs and Excel to systemize data processing on embodied & operational carbon (A1-B7) from sustainability reports and Environmental Product Declarations on M&E equipment, accelerating database progression by 30%.
- Analyzed and extrapolated correlations using statistical modelling with Python, building visualization dashboards, and bolstering precision of global warming potential estimation (emissions calculation) by 20%.
- Initiated and led the development of an analytical framework that incorporates maintenance as a variable, incorporating factors such as refrigerant leakages and frequency of oil substitution in transformers, expanding the calculator's use case.

Product Manager at HedgeDrip (B2C SaaS Fintech Startup) **Aug 2023 - Dec 2023**

- Collaborated across cross-functional teams in the design and execution of product strategy, bolstering customer retention by aligning product offerings with consumer pricing sensitivities.
- Spearheaded product-market fit validation, analyzed and implemented consumer trends within the FinTech vertical, increasing early adopter retention rate by 15%.
- Identified pain points to landing page's user interface, thus designing and conducting A/B experiments (with Figma), increasing conversion rate by 35% upon final design launch.

Strategy Associate at Toolscovery (Investor's Top Pick at Stanford Demo Day) **Jun 2023 - Aug 2023**

- Engineered Go-To-Market (GTM) strategies for a B2C-driven startup in the biotech vertical, leveraging competitive pricing analysis and partnership development to drive a 30% increase in web traffic.
- Synthesized data insights and curated proposals to inform strategic (32% success rate), allowing for validation of product-market fit, thereby contributing to Toolscovery's value proposition amidst market pricing challenges.

COMPETITIONS AND AWARDS

Indonesia Venture Capital Club (IVCC) Exclusive Member **Jul 2023 - Present**

- Selected as a top tier candidate (among 341 applicants, <10% acceptance) for Indonesia's premier Venture Capital club, demonstrating exceptional acumen in venture finance and investment analysis.
- Utilized financial valuation techniques (Scorecard, Berkus and VC) on prospective startups akin to Ventura portfolio.
- Formulated and presented an investment thesis on a pioneering health-tech startup based in Singapore, demonstrating analytical depth and strategic insight, which assisted MDI Venture's investment evaluations.

Tech for Social Good Champion **Jun 2023 - Sep 2023**

Port 63 by NTU (40 teams; 10k Cash Prize + 10k Green Lane Grant)

- Engineered (with Figma) a proximity-based matching app (NavigEyes) that allows Visually Impaired Individuals to be matched with human aids in multi-tenanted locations like malls.
- Developed and implemented user research methodologies and frameworks, securing partnerships (100% success rate) with malls across Indonesia and Singapore to execute pilot projects.
- Pitched NavigEyes' value proposition to judges from SG Enable, A*Star, NTU and raiSe Singapore.

Most Socially Impactful Solution **May 2023 - May 2023**

N-Novate x SGD Open Hack 2023 (14 teams; NUS-wide hackathon; 10k Green Lane Grant)

- Developed WeaveAbility, a marketplace that empowers Persons with Disabilities (PWD) to sell self-designed reworked clothes, allowing for unique competition advantage on top of hard + soft skills.
- Conducted extensive market research in the marketplace vertical, determining WeaveAbility's final value proposition, financial viability, and business (revenue model).
- Pitched WeaveAability's value proposition to judges from Social Impact Catalyst, Impact Investors and Häring & Co.

CO-CURRICULAR ACTIVITIES

Managing Director of Product and Strategy at StudentsCatalyst SEA **Mar 2023 - Dec 2023**

- Led two departments (3 managers&11 associates) to spearhead SEA's first region-wide student incubator, bridging under-privileged students across the region to industry-leading mentors, culminating in a business case competition.
- Strategized region-specific proposals and outreach, leveraging thorough market research and identification of firm specific pain points, securing 3 case partners: FinTech startup, a university-based consulting firm and a F&B MnC.
- Impacted 500+ students across the region and funneled 0-30 media partnerships to our ecosystem (SEA & beyond).

Startup Investment Analyst at NUS Alumni Ventures (NAV) **Sep 2023 - Present**

- Executed thorough due diligence for startups in the MedTech and TravelTech vertical, enhancing the precision of investment decisions through meticulous financial analysis, market trend research and robust interpretation of data.
- Initiated deal flow as a rep. of NAV by proactively connecting with founders in startup events, delivering monthly investment pitches to align with the angel fund's objectives and risk appetite whilst influencing fund allocation.

Research Analyst at NUS Entrepreneurship Society **Feb 2023 – Jul 2023**

- Crafted a bi-annual startup playbook on the burgeoning role of Data Science in ASEAN within a team of 5.
- Integrated Large Language Models and streamlined industry trend analysis, improving efficacy of market study by 30% and completed actionable 2 weeks in advance.
- Proposed and initiated further industrial analysis on the potency of Data Analytics and Machine Learning within the manufacturing vertical, contributing to research use-cases on predictive analytics and supply chain optimization.

ADDITIONAL INFORMATION

Awards and Certificates:

- NUS HealthHack 2024 (Top 5 Finalists amongst 110 submissions – Global hackathon)
- SPS Psychathon 2023 Gold Award (1st place at Singapore-wide 2-month long hackathon)
- Battle-X Champion (1st place at a Singapore-wide startathon)
- High School salutatorian (IB Diplomma Programme: 44/45)

Language: English and Bahasa Indonesia (Native), Chinese Mandarin (Conversational Proficiency)
Hobbies: Exploring hidden food gems | Hiking | Soccer + basketball (Captain) | National school rep. (Table Tennis)
